Re: Proposed Amendment to Planning Permissions & PL. 17.219721 (SA/60050) & SA/901467

Indaver Ireland Waste-to-Energy facility at Carranstown, Duleek, Co Meath

www.indaver.ie

Dear Sir/Madam,

The needs of businesses and waste collection companies regarding residual waste outlets have resulted in Indaver taking the decision to seek minimal amendments to its waste-to-energy facility in Co Meath. The proposed amendments will not require large scale construction or change in the processes involved at the facility. Please find attached a briefing paper on the amendments.

Indaver hopes to submit a planning application and accompanying environmental impact statement (EIS) to An Bord Pleanála for an amendment to the existing planning permission. The vast majority of environmental aspects remain unchanged from the previous EIS assessment (2009). An environmental impact assessment is being carried out to evaluate any impacts of the amendments. This study is on-going and we would like to get input from interested parties.

Please contact me on if you would like further information on the amendments.

Yours sincerely,

Conor Jones
Infrastructure Director
